ASSESSMENT TOOL 1 – Coding Challenge Task

Course Code:	CSA06	Course Title:	Design and Analysis of Algorithms
CO Assessed:	CO4: Articulation (BL4, BL5)	Assessment:	Assessment Tool 1 – Coding Challenge Task
Weightage:	40% of CIA	Total Marks:	100
CO4 Statement:	Solve optimization problems using dynamic programming and greedy strategies.		
Student Name:	D.Heemasree	Reg. No.:	192524114
Section / Batch:	2025	Date:	

Instructions to Students

- Answer the following question. Total Marks: 100.
- Carefully analyze the given questions.
- Write clear code for the given problem.
- Analyze the Time complexity and Space complexity of your code using dynamic programming and greedy strategies

Question Type	Focus Area	Questions
Coding Challenge Task	Focus on Code and analyze optimization problems using dynamic programming and greedy strategies	Q1

Q1 Rod Cutting Problem

100 marks

A manufacturer has a rod of a fixed length and a list of prices corresponding to different possible piece lengths. The rod may be cut into smaller parts in any valid way, and the objective is to maximize the total selling price obtained from the cuts. The problem requires finding the most profitable combination of cuts. Use Dynamic Programming to determine the maximum obtainable value.

Input Format:

n = length of rod

price[] = prices of pieces from length 1 to n

Your Code

```
1 def rod_cutting(prices, n):
2     dp = [0] * (n + 1)
3
4     for i in range(1, n + 1):
5         for j in range(1, i + 1):
6             dp[i] = max(dp[i], prices[j - 1] + dp[i - j])
7
8     return dp[n]
9 n = 5
10 prices = [2,5,7,8,10]
11 print(rod_cutting(prices,n))
```

Input

2 5 7 8 10

Output

12

SECTION A – Coding Challenge Task

Code of Conduct

I D.Heamsree(192524114) (Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

RUBRICS FOR CALCULATION

Coding Challenge Task

Criteria	Weightage	Level 4 (Exemplary)	Level 3 (Proficient)	Level 2 (Developing)	Level 1 (Beginning)
Problem Understanding	20%	Clearly understands problem constraints, edge cases, and competitive requirements	Understands problem with minor gaps in constraints	Partial understanding; misses key constraints	Misinterprets problem or constraints

Algorithm	25%	Selects optimal algorithm with best time and space complexity for competitive constraints	Uses efficient algorithm with minor scope for improvement	Uses basic/inefficient approach	No clear algorithmic approach
Code Implementation	20%	Writes correct, efficient, and clean code that passes all constraints	Code works with minor errors or inefficiencies	Partially correct code; fails for some cases	Code does not execute or gives incorrect results
Competitive Performance	20%	Solves problem within time limits and handles large inputs effectively	Solves within acceptable time with minor delays	Struggles with time limits or larger inputs	Unable to solve within time constraints
Test Case Handling	15%	Handles all test cases including edge and hidden cases	Handles most test cases	Misses important edge cases	Fails on multiple test cases

Marks Evaluation:

Criteria	Wt.	Level 4 – Exemplary	Level 3 – Proficient	Level 2 – Developing	Level 1 – Beginning
Problem Understanding	20%				
Algorithm	25%				
Code Implementation	20%				
Competitive Performance	20%				
Test Case Handling	15%				
Total Marks (100):
